

OWNERS MANUAL

■ Corner installations

Align the rearmost edges of the Sound Diffuser panels to the dotted lines as shown, using the rear edges of the speaker as positioning guides. The height of the panels should be such that their centers are in line with the center of the speaker.

■ Installations with less than 5 feet of clearance on one side

Align the rearmost edge of the Sound Diffuser panel to the back plane of the speaker. The height of the panel should be such that its center is in line with the center of the speaker.

■ Placement

1. Please refer to the above instructions to determine the optimum mounting location.
2. Attach the Sound Diffuser to the wall by affixing it with adhesive tape applied to the corner caps.
3. If the adhesive tape does not work on your wall, use map pins which have enough length for the thickness of the Sound Diffuser.

Warning

1. Do not bend the Sound Diffuser as it may be cracked.
2. Make sure that the Sound Diffuser is firmly attached to the wall in order to avoid any accidental damage.
3. Please note that the adhesive may cause damage to certain types of walls if it is removed.

Size 15.75" x 24" x 2"

Weight 8 oz.
